03/11/2023 09:02 Class Player

Class Player

Namespace: <u>SpicyInvaders</u>
Assembly: SpicyInvaders.dll

```
public class Player : ObjectBase
```

Inheritance

<u>object</u> □ ← <u>ObjectBase</u> ← Player

Inherited Members

Constructors

Player(int, int, ConsoleColor, int, int)

Initialisation de l'objet et enregistrement de ses valeurs

```
public Player(int originX, int originY, ConsoleColor color, int speed, int life)
```

Parameters

originX int♂

originY int♂

color ConsoleColor ☑

speed <u>int</u>♂

life <u>int</u>♂

Fields

canAttack

03/11/2023 09:02 Class Player

```
public bool canAttack
```

Field Value

<u>bool</u> ☑

dimensionX

```
public int dimensionX
```

Field Value

<u>int</u>♂

dimensionY

```
public int dimensionY
```

Field Value

<u>int</u>♂

moveAllowLeft

```
public bool moveAllowLeft
```

Field Value

<u>bool</u> ☑

moveAllowRight

```
public bool moveAllowRight
```

Field Value

bool₫

nickName

```
public string nickName
```

Field Value

<u>string</u> □
